

TEJAS

RANCH & GAME FENCE

Tree & Underbrush Clearing

SELECTIVE CLEARING *For An Improved* WILDLIFE HABITAT

Undesirable trees – such as Cedar and Yaupon Holly – and other underbrush can severely limit the usefulness of Texas ranch land, choking off grass and robbing precious water resources.

Tejas Ranch & Game Fence has both the equipment and expertise to clear your property, with the ability to mulch large stands of trees with a 2016 Barko 930B with a FAE Advanced Technologies Shredder, and other machinery designed to efficiently remove underbrush and overgrowth.

Benefits to Select Clearing and Brush Sculpting:

- Development of native plants, grasses and forbs
- Healthy habitat for deer and native wildlife
- Enhanced soil conditions, high organic matter
- Cost savings compared to “Doze, Pile & Burn”
- Preserve desirable trees and plants for shade

Contact us today about your property plans, and we will help you with a strategy to meet your goals.
